**eMedia Music to Release eMedia Bass Method Version 2.0
Now with Instant Feedback, New Note and Finger Tracker, an Enhanced Interface and more.**

Seattle, WA —1/10/2011. eMedia Music Corp., publisher of the world's best-selling series of music tutorial CD-ROMs announces *eMedia Bass Method v2.0*. Guitar World Magazine has said *eMedia Bass Method* "offers a firm foundation for any aspiring bassist." The new features and improvements in this major upgrade will help aspiring bass players learn faster and easier than ever before.

New *Instant Feedback* listens to your playing through the computer's microphone and highlights correctly played notes. It's like having a teacher point out a mistake so the student can correct it and continue on. In addition, the new *Note & Finger Tracker* shows the actual note being played on an on-screen fretboard, and in standard music notation. It helps makes learning to read music easy!

eMedia Bass Method v2.0 now also features full-screen lessons and remastered video. The over 140 lessons start with the basics, such as tuning the bass, and move on to playing simple bass lines and catchy rhythms with fills, syncopation and shuffle rhythms. They continue on with reading tablature and standard music notation. A new theory chapter covers intervals, scales and triads.

Featuring more than 30 Videos and over 200 songs & exercises, *eMedia Bass Method v2.0* includes folk, rock, country, and popular songs—including songs made famous by Bob Dylan, Steve Miller Band, Los Lobos, Creedence Clearwater Revival, The Grateful Dead, and many more. Recorded multi-track audio includes full audio, bass-only audio and "no bass" audio for playing along. Variable-speed MIDI tracks are also included. Bonus accessories, which include a digital metronome, automatic tuner, and digital recorder, make *eMedia Bass Method v2.0* a complete package with everything you need on one CD-ROM. *eMedia Bass Method v2.0* is the ultimate way to learn how to play bass!

eMedia Bass Method v2.0 will be released in March 2011 and will be available at retail stores nationwide and online at an estimated retail price of \$59.95. The CD-ROM will be a hybrid for both Windows and Macintosh platforms.
