eMedia Music Releases EarMaster Pro

Seattle, WA — February 14, 2006, *eMedia Music Corp.*, publisher of the world's best-selling and award-winning series of music instruction CD-ROMs, announces the release of *EarMaster Pro* and *EarMaster School* ear training software CD-ROMs from EarMaster APS.

Music is really all about hearing. When you play or hear music, your ear recognizes melodies, but can also be trained to identify notes, intervals, chords, modes and all other important music elements. If you want to sing, improvise or jam with confidence, you need to recognize all of these elements. Ear training can make this possible. *EarMaster Pro* is the perfect ear training solution for musicians and music lovers at all skill levels, whether instrumentalists or singers. *EarMaster Pro* includes 651 ear training lessons for recognizing and transcribing intervals, chords, scales, rhythms and melodies. You can interact with *EarMaster Pro* using the staff or the onscreen instruments: piano, guitar, bass, violin, cello, banjo and others. It provides detailed statistics on your progress and even allows you to create your own customized exercises. Learn to play, improvise and compose by ear. Making music with others will become easy and fun!

EarMaster School is the educational version of *EarMaster Pro*. It is an easy to use, interactive and powerful tool for teaching ear training at all skill levels. The learn-by-doing teaching approach allows students to develop a better musical ear. *EarMaster School* includes all of the features and exercises in *EarMaster Pro* and goes further. It allows you to create custom class lessons using the tutor editor and supports progress tracking with multiple users across a network allowing for easy implementation in the classroom or computer lab. Multi-user lab packs and site licenses are also available for classroom, school and district implementation.

EarMaster Pro is available now at computer and music retail stores nationwide and online outlets for an estimated street price of \$69.95. *EarMaster School* is also available now for an estimated street price of \$129.95. Both CD-ROMs are compatible with Windows 98 SE, 2000 and XP
