New *MagicScore Notation for MS Word* Dynamic Notation Plug-in for Microsoft Word

Seattle, WA – September 15, 2016. [eMedia Music Corp.](http://emediamusic.com), developer and distributor of award-winning music software, has begun shipping version 8 of ***MagicScore Notation for MS Word***. Created by Maestro Music Software, the software works as a plug-in for Microsoft Word® and allows dynamic creation and editing of music scores, guitar tabs, notes, and music symbols in Word.

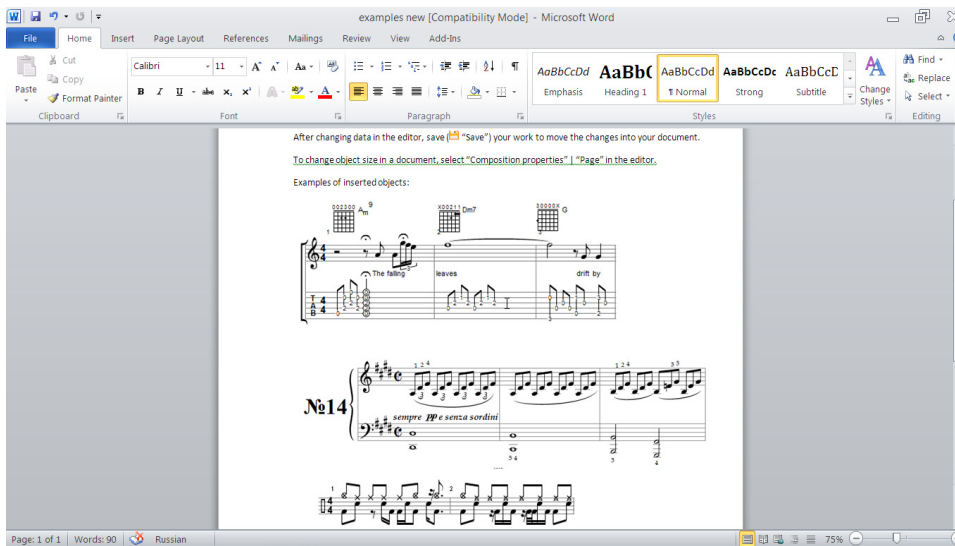

MagicScore Notation For MS Word is powerful music notation software that enables the placement of editable music notation in a Microsoft *Word* document. It's great for educators, lessons studios, bands, and worship leaders — anyone who needs to distribute music notation with performance notes and graphics and doesn't want to require students or band members to purchase notation software.

Other notation programs only export an image of the score which cannot be changed once imported into *Word*. *MagicScore Notation for MS Word* lets you easily edit music notes in *Word* as well as musical symbols and other parts of a musical score. Simply place the MagicScore Notation object in a *Word* document, click on the part of the music that needs to be changed, and it launches the editor window. Select "Update" in the editor and the changes are instantly reflected in *Word*. Anyone with *Word* will be able to open, view, and print your document with the included score and can even edit non-notation elements on the page such as text or graphics.

MagicScore Notation For MS Word is a great tool for educators. Creating music worksheets, flash cards, and tests is easy when adding notes and music symbols in *Word*. Text and music notation flow together easily in a single *Word* document for easy distribution. Importing MIDI, MusicXML, and gp4 guitar tab files (compositions, examples, exercises, etc.) and adding fingering suggestions and performance comments makes creating lessons faster. Editing the pitch of individual music notes and transposing parts for any instrument are easy tasks. Adding tables, charts, formulas, text, and more with *Word*'s tools along with music notation allows quick creation of rich documents.

MagicScore Notation For MS Word is a plug-in for a host application, not a stand-alone product like *MagicScore Maestro*. *Word* is the officially-supported host, but *MagicScore Notation for MS Word* currently works with other programs that support OLE (object embedding) including Open Office.

Features:

- Full-featured notation software that lets you place music notation with editable notes, chords, and music symbols in *Word*. Even creating guitar tabs in *Word* is easy!
- Note entry via the Note Palette, a virtual piano or guitar, Chord Builder, key commands, or MIDI keyboard lets you quickly add music notes in *Word*. Part extraction allows music notation in *Word* for individual parts in score.
- Listen to your music with dynamics and articulations using MIDI orchestral and band sounds.
- Drag and drop articulations, dynamics, or tempo markings anywhere in the score and easily attach them to any note or measure Add music symbols in *Word* the easy way with MagicScore's extensive tool palettes.
- Write music in clean, crisp notation using flexible templates, multiple articulations, and dynamics while having access to an unlimited number of staves and measures in each score. Customize any of the predefined ensemble templates or choose from dozens of instruments and staff configurations. No more fussing with music fonts in *Word* that can never deliver a satisfying score. Save files in DOC format for unsurpassed compatibility and ease of use.
- Print documents complete with any annotations or instructions directly from within *Word*.
- Extensive and interactive Help system.

MagicScore Notation For MS Word is available now via the [eMedia Music website](#). Suggested retail price is \$99.95 (USD).

About eMedia Music

eMedia Music Corporation is an award-winning software developer and distributor dedicated to producing high-quality, interactive music instruction software and DVDs. Formed in 1994 by Adrian Burton, formerly a manager at Microsoft Multimedia Publishing, eMedia is now the world's leading publisher and distributor of music instruction software and DVDs. eMedia's flagship titles are the best-selling *eMedia Guitar Method* and *eMedia Piano and Keyboard Method*. eMedia also distributes other software titles including *EarMaster Pro* for ear training; *Guitar Pro* for guitar notation; *Music Theory Tutor* for learning music theory and PG Music's *Band-in-a-Box* for auto-accompaniment.
