eMedia Music Announces Piano Scores Unlimited DVD-ROM

Seattle, WA —June 5, 2009. eMedia Music Corp., publisher of the world's best-selling series of music tutorial CD-ROMs, announces the upcoming release of IPE Music's *Piano Scores Unlimited*. This invaluable addition to any home or school music library is the largest digital collection of popular piano scores from the masters available on one DVD-ROM.

The *Piano Scores Unlimited* DVD-ROM puts 630 major works from Bach, Beethoven, Chopin, Joplin, Mozart, Schubert and many others at your fingertips for less than ten cents per score. With 2,500 pages of printable music, pianists at every level will find something new to play. *Piano Scores Unlimited* allows you to print high-quality, royalty free sheet music with no restrictions. *Piano Scores Unlimited* is easy to navigate for everyone: scores are available sorted by *Composer, Level of Difficulty, Style* or *Alphabetical*. An important bonus feature of this product is the 26 hours of recorded scores. The scores were recorded by virtuoso pianists, and listening to them will engage players on a whole new level – inspiring them to emulate master musicians playing these classic recordings. These recordings are formatted as exportable MP3 files, royalty free without restriction, so you can begin building your classical music collection at home or in your classroom today!

Piano Scores Unlimited is an exceptional way to teach and learn about music from the great composers. Each score is from the first edition of the original work by the composer. Beginning through expert pianists, piano teachers, music schools, libraries, conservatories and concert performers can use or print and give the scores out freely for practice, lessons, exams or homework. Teachers can tailor the scores to their individual lesson plans by printing portions or complete collections as often as they like, and these exceptional graphic quality scores are great tools for lessons, sight-reading or discussion.

Piano Scores Unlimited will be released in June 2009 and will be available at computer and music retail stores nationwide with an estimated retail price of \$59.95. The Windows DVD-ROM is compatible with Windows 2000, XP and Vista. A free downloadable demo is also available from eMedia Music: http://www.emediamusic.com/demo/PianoScores_PC.
