eMedia Music Announces the Release of TimeStretch
Learn or practice any piece of music at any speed!

Seattle, WA— October 13, 2009, eMedia Music Corp., publisher of the world's best-selling series of guitar tutorial CD-ROMs, announced the release of *TimeStretch*. Published by I.P.E. Music, *TimeStretch* lets you learn or practice any piece of music at any speed. It slows down the music without changing pitch so you can play along slowly and gradually come up to tempo. Music teachers will be delighted by how much easier it is to transcribe or analyze a song with adjustable tempo. Additionally, *TimeStretch* can transpose a piece of music, adjusting it to a higher or lower register as needed. Pieces of music can be extracted from audio CDs or MP3s, and then *TimeStretch* adjusted versions of the music can be saved as WAV, MP3 or WMA files or burned to a new custom audio CD.

TimeStretch opens up a new world of song manipulation, helping you become a better musician, a more effective teacher or simply allows you to have more fun as a music hobbyist. Jam out with your favorite group by reducing the speed to a tempo you're comfortable with. You'll be able to hear exactly what's being played and learn your part. Adapt, select parts, save and burn from your audio CDs and WAV, MP3 and WMA files. 6 languages are included with *TimeStretch*: English, French, German, Spanish, Italian, and Dutch.

TimeStretch will be available at computer and music retail stores nationwide in October at an estimated retail price of \$29.95. The CD-ROM is Windows (XP/Vista/Windows 7) compatible. For more information, please visit: www.emediamusic.com. A Trial Version of TimeStretch may also be downloaded from eMedia's website: http://www.emediamusic.com/demo/TimeStretch_PC
